

Complaint Exhibit No. 2.

**U.S. Patent No. US7,650,376 v. AMC Networks
Exemplary Claim of Infringement, Claim 37**

Complaint Exhibit No. 2.

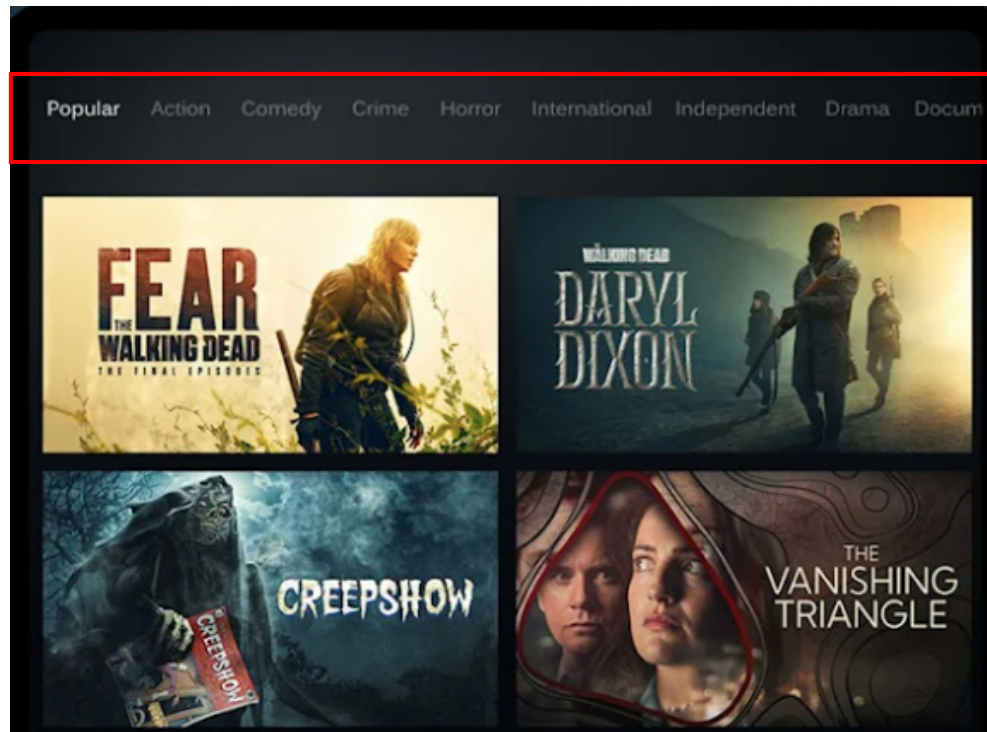

1. Claim Chart

Claim	Analysis
<p>[37.P] A computer readable storage medium or media encoded with one or more computer programs including instructions for effecting the provision of content over a network, comprising:</p>	<p>AMC Networks (“Company”) makes, uses, sells, and/or offers to sell a computer-readable storage medium or media encoded with one or more computer programs including instructions for effecting the provision of content over a network,</p> <p>This element is infringed literally, or in the alternative, under the doctrine of equivalents.</p> <p>For example, Company provides the AMC+ application, a streaming platform (“computer-readable storage medium or media encoded with one or more computer programs”), that allows users to watch originals, series, movies, and live TV. Further, AMC+ operates as a virtual multichannel video programming distributor (v-MVPD) that provides on-demand video content over the internet (“effecting the provision of content over a network”).</p>

Complaint Exhibit No. 2.

How does a Virtual-MVPD work?

A Virtual MVPD operates in the same way as an MSO by acting as a content service provider, without any constraints of directly owning the network infrastructure for content delivery. They

1. Sign up content distribution agreement with multiple providers.
2. Host the content for streaming via 3rd party internet.
3. Provide a streaming device at the customer premise to receive the content securely. Some of them pre-integrate this with TV manufacturers.
4. Stream the content through customer's choice of broadband provider.
5. Bill the customer on a subscription/ transaction basis for the content

Further, to the extent this element is performed at least in part by Defendant's software source code, Plaintiff shall supplement these contentions pursuant to production of such source code by the Company.

Complaint Exhibit No. 2.

<p>[37.3] instructions for ascertaining that the node server transmitted the specified content to the client, wherein an owner of the node server is offered an incentive as compensation for transmission of the specified content to the client.</p>	<p>Company provides instructions for ascertaining that the node server transmitted the specified content to the client, wherein an owner of the node server is offered an incentive as compensation for the transmission of the specified content to the client.</p> <p>This element is infringed literally, or in the alternative, under the doctrine of equivalents.</p> <p>For example, when the user selects the content, the application identifies the content/service provider and securely delivers the requested content to the user. Therefore, it would be apparent to a person having ordinary skill in the art that the application includes instructions for ascertaining that the content providers transmitted the specified content to the user.</p> <p>Further, the application provides multiple subscription plans for the user to access the content provided in the application such that the user is billed for accessing the content. Therefore, it would be apparent to a person having ordinary skill in the art that the AMC+ application (“an owner of the node server”) receives an incentive as compensation for transmitting the specified content to the client.</p>
